

## PRESS RELEASE

Certified Aviation Services Celebrates its 25<sup>th</sup> Anniversary This Year

Ontario, CA Jan 26, 2015 -- Certified Aviation Services, LLC (An Aero-Mark Company) A Leading technical innovator in MRO Line Services and AOG repair celebrates its 25th anniversary this year. Co- Founder Mike Scanlon created CAS with his father to meet a growing airline industry's line maintenance needs at John Wayne/ Orange County Airport in 1990. Since that time, CAS has evolved from 1 line station to 15 fully staffed line maintenance stations expanding from the west coast to the east coast and as a top MRO provider with capabilities for heavy airframe repair and modification with a domestic and global reach.

"CAS has successfully grown to a preferred line maintenance provider for both International and Domestic Operators and is continuing to innovate to meet both OEM and Aircraft Fleet Operators ever changing technical support requirements," said Mike Scanlon, Co- Founder and VP of Operations. "It has been a privilege to be part of a world class leading company with such a long standing history in the Line Maintenance world. CAS now has a management team that is not only focused on building its large customer base in Line Maintenance and OEM work, but can now look to expanding its global presence" said Mike Turpin, General Manager.

CAS will begin the 25th anniversary year by adding 2 additional stations on the west coast to its network of 15 line stations. CAS has a customer base of over 60 Operators including OEM's, with long term commitments for Line Maintenance support. Several commitments will expand into new stations and into heavier scope of work beginning this year. CAS has also recently expanded its technical services portfolio to add Aircraft Teardown in the U.S.

About Certified Aviation Services

CAS (An Aero-Mark Company) is a Nationwide Line Maintenance Support Services provider that offers a broad range of innovative line services that includes complex on-wing modifications, line maintenance, gas path engine washing, and aircraft exterior cleaning services. CAS' comprehensive FAA/EASA 145 Repair Station Certificate and D100 FAA Authorization allows it to perform modification and heavy maintenance throughout the US and abroad. CAS' unique approach of partnering with large domestic and international carriers allows it to deliver flexible and superior quality line services, while improving operational efficiency and reducing maintenance costs for all customers.
