

PRESS RELEASE

CAS Successfully Performs 12-Year Heavy Maintenance Check

Ontario, CA May 2nd, 2018 – Certified Aviation Services LLC (CAS) is honored to announce they have successfully integrated additional capabilities with Orbital ATK, leader in aerospace and defense technologies, by performing a 12-year heavy maintenance check on the last operating L-1011 aircraft. The heavy maintenance visit included, structural inspections and Corrosion Prevention and Control Program (CPCP).

The L-1011 aircraft was delivered to CAS' facility in Ontario, California. The project was completed 18 days earlier than the projected finish date. CAS conducted the inspection in accordance with the Orbital ATK L-1011 heavy maintenance inspection program, including structural inspections of all zones. CAS removed engines 1 and 3 to conduct the non-destructive inspection (NDI) of the engine mount bolts.

Michael Scanlon, CAS' Vice President of Operations stated, "Orbital ATK has been a customer for over 25 years. CAS has assisted Orbital ATK with over 40 Pegasus rocket launches, as well as several maintenance checks. CAS plans to continue to support Orbital ATK."
